

CONTENTS

<i>List of Illustrations</i>	xi
<i>Preface and Acknowledgments</i>	xvii
<i>Introduction</i>	xxvii
Section I: Basics of Methodology in Human Sciences	1
1. Introduction and Objectives	3
2. Topic of the Study	8
3. Finding the Literature	13
4. Concepts	21
5. Research Problems and Hypothesis	25
6. Research Design and Sampling	30
7. Measurement Instrument and Its Trustworthiness	39
8. Results and Selection of the Method	52
9. Discussion and Implications for Practice	56
Section II: Basics of Test Theory and Test Construction	65
10. Introduction and a Brief History of Test Theory	67
11. Principles of Writing Items	71
12. The Process of Creating a Measurement Instrument	89
13. Validity of the Measurement	97
14. Classical Test Theory	105
15. Latent Ability and Item Response Theory	132
16. Principles of Item Banking and Adaptive Testing	153
17. Two Practical Examples of Test Construction	163
Section III: Basics of Qualitative Research	185
18. Introduction to the Qualitative Research	187
19. Concepts of Qualitative Research	190
20. Strategies to Acquire Qualitative Knowledge	196
viii Essentials of Research Methods in Human Sciences: Volume 1	
21. Methods to Acquire the Qualitative Data	216
22. Analysis and Interpretation of Qualitative Data	229
23. Qualitative Report	239
24. Combining Qualitative and Quantitative Approaches	241
Section IV: Basics of Futures Studies	249
25. Introduction to Futures Studies	251
26. Futures Studies and Scientific Knowledge	255
27. Weak Signals and Decision-making	261
28. Methods for the Futures Studies	264
Section V: Basics of Statistical Description	297
29. Introduction to Statistical Analysis	299
30. Data	301
31. Condensing the Data: Basic Statistics	306
32. Cross-tabulation	319
33. Scales and Correlation	328
34. Testing the Difference of Means	352
Section VI: Basics of Statistical Inference	377
35. Introduction to Statistical Inference	379
36. Probability	387
37. Population, Sampling, and Probability Distributions and Their Use	399
38. Principles of Hypothesis Testing	412
39. Examples of Significance Testing	427
40. Confidence Interval	442
41. Effect Size and Principles of Meta-analysis	455
<i>References</i>	491
<i>Index</i>	517
<i>About the Author</i>	529
