

Volume 3: Advanced Analysis

<i>Preface and Acknowledgments</i>	vii
Section I: Basics of Nonparametric Statistics	1
Brief Glossary for a Beginner Researcher	3
1. Introduction	5
2. Introduction to Nonparametric Methods	11
3. Tests for One Sample	26
4. Tests for Related Samples	90
5. Tests for Independent Samples	140
6. Nonparametric Measures of Association	224
7. Views on Nonparametric Multivariate Methods	272
Section II: Basics of Experimental Research in Human Sciences	281
8. Introduction to Experimental Research	283
9. Experimental Designs	300
10. Analyzing Experimental Designs	323
Section III: Basics of Multilevel Modeling	405
11. Introduction to Multilevel Modeling	407
12. Traditional Regression Analysis	412
13. Special Characteristics of Multilevel Modeling	423
14. Multilevel Modeling Using HLM	444
15. Multilevel Modeling Using MLwiN	466
16. Multilevel Modeling Using SPSS	495
17. Diagnostic Examination of the Models	524
18. General Comparison of the Software Packages	527
Section IV: Basics of SEM and Path Analysis in AMOS Environment	531
19. Background and History of SEM	533
20. Research Questions and Assumptions in SEM	536
21. Briefly on Theory and Concepts	540
22. Technical Execution with AMOS	565
Section V: Basics of Survival Analysis	597
23. Introduction to Survival Analysis	599
24. Life Tables	601
25. Survival Analysis	619
<i>References</i>	658
<i>Index</i>	517
